

I am writing to encourage the FCC to not allow LPFM stations to take priority over current FM translator service. K-LOVE is a station which serves me and my family by advising us of local community events. The station is encouraging to my family as I don't have to worry about the content of the discussions on the air. This station is a HUGE blessing to my family as it shares uplifting information and plays music that is whole-some and clean. Please do not allow LPFM stations to be expanded to my area and thereby replacing my family's favorite radio station. Keep this wholesome station on the air, there is plenty of garbage on the air already. Our families need to be able to hear good, clean music, up and coming generations need this! Thank you for your concern in this matter.
